ECOSPILL
LEVEL 4 SPILL TRAINING TRAIN THE TRAINER

Intermediate Training Course Code: LVL4ADVN+

Overview:
This advanced course is designed for up to four competent key personnel or your designated in-company trainers who will be responsible for delivering level 1 basic spill kit training to colleagues. It combines the full level 1 foundation content with an additional section at the start focused on preparing trainers to confidently run sessions within their own workplace. This course differs from a Level 3 as it includes an external wet demonstration.

The course is not intended to teach general presentation skills or how to become a professional trainer. Instead, it is aimed at experienced trainers or suitably skilled personnel who are already confident leading workplace training sessions.

Spill Training
Train The Trainer

Duration & Delegate Info
Session length: Up to 4 hours
Max attendees per session: 4 delegates

Course Objectives:
By the end of this course, attendees will:
- Understand what constitutes a spill and the types of hazards involved.
- Be able to identify, select and safely use absorbents and spill kits.
- Recognise the importance of having a simple, effective spill response plan.
- Appreciate the environmental, financial, and reputational impact of unmanaged spills.
- Be equipped to take practical first-response action using the spill control products available on-site.
- Learn in application with an internal and external demonstration.
- To be able to present a Level 1 course back to their colleagues.

Course Outline:
- Train the trainer section – some simple steps to help train colleagues.
- Defining spills – incidental vs emergency.
- Common causes and consequences of spills.
- Understanding governing legislation.
- Statistics and real-world examples.
- An explanation of Emergency Spill Response framework and the '10-step plan' for safe and effective spill response.
- Overview of typical absorbents and their uses.
- A run through of the Ecospill product ranges.
- An internal demonstration.
- An external demonstration.
- A summary and some examples of 'bad practices'.
- Finish with a Q&A and interactive discussion.
- Time to study a section of the Level 1 presentation.
- A presentation back to the group of a section of the Level 1 course.

What You'll Need to Provide:
To get the most from the session, please ensure the following are available:
- A training room with sufficient seating, with space to effectively carry out a dry demonstration for up to 4 attendees.
- A method of viewing a PowerPoint (.ppt) presentation from a laptop, either via projector and screen, or a TV with HDMI connections.
- An area dedicated to carry out an external demonstration.
- An area dedicated to carry out an external demonstration.
- The external demonstration will require a hardstanding area approximately 3–4 metres wide and 6 metres long, coned off to traffic where necessary. A gentle slope within this space is preferred.
- This area will be needed for around 40 minutes during each course and should be located within a short distance of the training room.
- A clean water supply will be required to simulate spills, ideally provided via a hosepipe or a clean IBC, or drum at least half full.
- The final position for this can be agreed on arrival, and if possible, a forklift truck or a licensed driver from the course attendees should be available for a few minutes to assist.
- For the clean-up, please have a shovel, yard broom, and black waste bags ready.
- Attendees should also wear suitable clothing in case of poor weather.

Certification:
Each delegate will receive a Certificate of Attendance upon successful completion of the session. Certificates are valid for 2 years.

Questions:
If you have any questions, please contact your regional business development manager or email Ecospill at sales@ecospill.org.uk or call 01709 542 259.
